### Benefits of Global Nurses Training Programme

The GNTP will make our candidate a fit & fine to face any challenge in their field of nursing any where in the world. Their training course will make them professionally competent as they will be well versed with international best nursing practices & their salary will be 15 times higher to India.

### Fastest Earning Route

You can go to Canada and appear for the exam within 2-3 months instead of waiting for years. You can pursue your nursing career earlier and start earning your salary (Approx. \$50,000-60,000/annum) much earlier than people who go thru the regular route. (Average 2-3 years). Majority go to Canada and do odd jobs to earn a living and pay for their Upgrade classes. Majority of them usually get caught between arraging their lives and are not even able to appear for CNR Exams. (Lack of time to study and then loose confidence). So they quit their profession and continue to do odd jobs which are lowly paid.

**There is need for 10,000 Nurses only in Canada as of now and by 2020 there is expected to be Global shortage to the tune of 8,00,000 Nurses world over**
